for a creative world™

wacom®

Pro Pen 3D

Taking creativity to another dimension.

The Wacom Pro Pen 3D provides full navigational control in 3D. The three pen buttons are set right at your fingertips and allow you to pan, zoom and tumble in a range of 3D applications.

Each button can be quickly customized for many functions in any 3D or 2D application. The Wacom Pro Pen 3D also utilizes Wacom's most advanced pen technology for an incredibly sensitive, precise and natural experience.

Designed with 3D creativity in mind

- Designed in conjunction with 3D designers & engineers. Optimized button shape, location, and pen diameter for maximum comfort and efficiency.
- Wacom Pro Pen 2 performance included: 4x greater pressure sensitivity, exceptional tilt-response and lag-free tracking provide greater creative control.
- Works with Wacom MobileStudio Pro, Wacom Cintiq Pro or Wacom Intuos Pro (2017 model) and with any Windows or Mac application.

Default functions

	In 3D Applications*	All Other Applications
Anytime	Tumble / Rotate	Middle Click
When hovering	Pan	Mouse Wheel (Horizontal & Vertical)
When touching	Zoom	Ctrl + Mouse Wheel
Normal	Right Click	Right Click

All buttons are freely re-programmable to other functions.

Wacom Pro Pen 3D Design

Software compatibility

Wacom Pro Pen 3D works with ALL applications.
